

"COMPARTMENTED MODE/PERSONNEL SECURITY"

Change Subparagraph III.3.d(1), page 15, to read:

"All unescorted personnel requiring access to the central computer facility shall have a valid Top Secret clearance [(2)] and formal access approvals for all data processed and/or stored in the ADP system . . ."

Delete footnote 2. on page 15.

RATIONALE: Designed to avoid possible confusion. Since by definition, a Compartmented Mode system contains at least one type of SCI, then unescorted access to the central computer facility per se requires a formal access approval for at least one type of SCI, and that approval must automatically be in accord with DCID 1/14. By contrast, under III.3.d(2), remote terminals shall be secured at least to the Top Secret level, and if no SCI is to be accessed through that terminal under system control, then users need meet existing Department/Agency Top Secret clearance requirements.
